

# Adding Users or IP's to Open Internet Access

## Adding User:

If you want to give user access to open internet add him to the below role in Snowflake.

### HRDP\_OPEN\_NETWORK\_POLICY

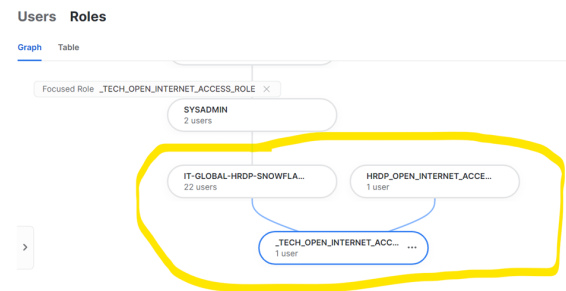

This task runs daily on Snowflake. If needed we can run manually same with below adding role.

**EXECUTE TASK HRDP\_ADM\_PD\_DB.IP\_WL.MASTER\_1\_DAY\_TASK;**

---

## Adding group of Users through Snowflake roles:

Attach the role to `_TECH_OPEN_INTERNET_ACCESS_ROLE` as per below screenshot

## Adding IP:

Add the IP to a table in snowflake which is used by a task run weekly to whitelist IP's.

```
insert into IPS_OTHER_APPS (app_name,ip)
```

```
values ('DBT','52.45.144.63')
```

```
,('DBT','54.81.134.249')
```

```
,('DBT','52.22.161.231')
```

```
,('DBT','52.3.77.232')
```

```
,('DBT','3.214.191.130')
```

```
,('DBT','34.233.79.135');
```
