

Roles Hierarchy

Roles hierarchy helps to understand the grantor and grantee on Snowflake.

Fire the below query on the snowflake UI to get the latest role hierarchy.

```
select
distinct grantee_name,name
from  SNOWFLAKE.ACCOUNT_USAGE.GRANTS_TO_ROLES
where grante
```

Put the output of the above query in the Roles Hierarchy xlsx under Parent role(grantee_name) and Child role(name) and click on the 'Show Hierarchy' button.

It will create the hierarchy in the 'Level Structure' sheet.

Below is the current state of the 'Roles Hierarchy' in the Prod environment.
